FROM AN ENVIRONMENTAL VIEWPOINT, WHAT'S THE GREATEST THREAT TO HUMAN		GBD study best estimate (95% CI)	WHO best estimate (95% C	
HEALTH?	Air (total)	65 (57-7-3)	65(5474)	
	Hoosehold air	29 (22-36)	43(37-48)	
- Air quality?	Ambient particulate	42(37-48)	30(37-48)	
. ,	Ambient czone	03(01-04)		
 6.5 million deaths/yr due to air quality (2.9 - 4.3 million/year due to indoor sources) 	Water (total)	18 (14-2-2)	08(07-10)	
	Unsafe sanitation	08 (07-09)	03(01-04)	
	Ursufe source	13 (10-14)	05(02-07)	
	Occupational	08(08-09)	04(03-04)	
D. J. L. L	Carcinogens	05 (05-05)	01(01-01)	
Drinking water/sanitation?	Particulates:	04(0)-04)	02(02-03)	
 0.8 - 1.8 million deaths/yr due to 	Soil, heavy metals, and chemicals	05 (02-08)	07(02-08)	
water-related disease	Lead	05(02-08)	07(02-08)	
Water related disease	Yotal	90	84	
Emerging infectious diseases?Overpopulation?	Note that the totals for air pollution, water pollution, and all pollution are less than the antiments sum of the moderate risk factor within each of these categories becaused meths have non-injury contribution—as possible air pollution also contributes at ambient air pollution also contributes are instead as pollutions also contributes to ambient air pollution and view versa. Table 1: Coloul estimated details (millions) due to pollution mix factors from the Coloul Burden of Disease study (CIID, 2003/7 versas WHO date			
 7.6 billion and counting 				

CDC IS FOCUSING ON 13 PRIORITIES

1	Healthcare accepiated infections

- 2. HIV/AIDS
- 3. Better data distribution (CDC Vital Signs)
- 4. More health discussion (webcasts, etc.)
- 5. Heart attack and stroke prevention [AQ]
 6. Cigarette smoking [AQ]
 7. Better newborn screening
- 8. Food safety [WQ]
- 9. Concussions
 10.Children's mental health [AQ, WQ]
- 11.Clinical preventive services for children/adolescents
- 12. Parasitic disease prevention [WQ]
 13. Prevention of violence against children (global)

WHO IS FOCUSING ON 5 PRIORITIES

- Non-communicable disease [AQ, WQ]
- 63% of all worldwide deaths

WQ: cancer vs. microbes

- Examples: CVD, cancer, asthma
- Microbial threats [AQ, WQ] Vaccinating more children
- Supporting universal health coverage efforts
- Monitoring progress toward the UN's Millennium Development Goals and Sustainable Development Goals [AQ, WQ]

DEVELOPMENT GOALS			

MDGS (MET BY 2015)

- Eradicating extreme poverty and hunger
- hunger Achieving universal primary education romoting gender equality and empowering women Reducing child mortality rates improving maternal health Combating HIV/AIDS, malaria, and other communicable diseases Ensuring environmental sustainability Developing a global partnership for development.

- SDGS (MET BY 2030)
- GS (MET BY 2030)

 No powerly

 In honger

 Soon health and well-being

 Quality education

 Gender equality

 Clean water and sanitation

 Affordable and clean energy

 Decent work and economic growth

 Industry, innovation, and infrastructure

 Reduced inequality

 Sustainable cities and communities

 Sustainable cities and communities

 Sustainable cities and communities

 Little below water
