

**EVE 486
Public Health**

HW#6

Due: FRIDAY, 18 October, 2019

1. Can a food product be labeled as *organic* without having been certified? What are the different “levels” of organic food labeling? Discuss the pros and cons of organic food.
2. Assess your personal risk for illness due to food contamination. Be quantitative, if possible.
3. Provide a brief overview of three (3) food-borne illnesses **not** discussed in class.
4. Who was Mary Mallon? Discuss her “contributions” to public health in 1-2 paragraphs.
