

**EVE 486/586
Public Health
Project #1**

Fall 2019

Problem Topics:

1. Emerging viruses...and environmental health
2. Allergens/irritants...and environmental health
3. Weather (floods/hurricanes, etc.)...and environmental health
4. Endocrine disruptors...and environmental health
5. Ultraviolet radiation...and environmental health
6. Alternatives to animal testing
7. **Something else? Just clear it with me first.**

Task:

Each team will prepare a 15-minute PowerPoint presentation (or a movie!) elucidating one of the topics above. The presentation must include (but is not limited to) the following:

- Problem Overview
- Summary of important scientific research/literature
- Policy conclusions and recommendations

Teams

1. Southwick, Thaxton, Ton-Nu
2. McCarthy, Oh, Warner
3. Conlon, Dungan, Wissmach
4. Peña, Riddell
5. **Dornisch, Young**

Due Date: Wednesday, 16 October, 2019

Note: In addition to the task shown above, graduate students are required to complete and submit a 5-10 page research paper exploring the chosen topic in greater detail.
