Topic: Repurposing the Bear Rock Café Space in University Center

Proposed Plan: The Bear Rock Café Space in the University Center will be renovated into a state of the art movie theater. The renovation will consist of demolition, construction of stadium seating, and installation of all necessary electronic devices. Once completed, students will be able to vote on Facebook®, Mercer99 page, for the top two movies to be played the following week. Movies will start at 7:00 p.m. and 9:00 p.m. and will play all week long. All movies will have free admittance and free popcorn. In conjunction with Mercer99 the movie theater will give student of Mercer University a place to relax and enjoy cinema quality experiences.

The demolition consists of removing the back room, current furniture, and stage platform. The construction will consist of staggered seating, sixty foot movie screen, and a floating wall facing the interior of the entrance. The necessary electronics are Dolby Digital 7.1 surround sound with amplifiers, dual high definition projectors with necessary wires, media control booth with laptops, lighting in the floor, popcorn machine, and automatic blinds for the current windows.

Period of Performance: Three months, out of the give contract year
