Technical Approach Outline

I. Transition from Introduction

II. Write 2-3 sentence overview of Technical Approach (a preview section/intro)

III. Clearly write problem statement & solution   "As stated earlier in the proposal…."

IV. Describe goals and objectives of project – the features of your game, as in your user stories (1-3 pages). You can include drawings/screen grabs/schematics of what your game might look like, even if they are simple sketches

V. Describe project in detail -- explain and list steps to create project (look at the MERC proposal from last spring for help); write as though you are explaining to a supervisor how you will complete this project

VI. Write a simple evaluation plan that shows how you measure success – what factors will tell you whether the project is successful. Completely described in proposal? Funded on Kickstarter? Built as a an actual game by MERC?

VII.   Summarize TA & make transition to Operations Plan
