Team Presentations on Learning Theories

Objectives:
1. Define the theory
2. Describe how it can be applied in instructional design
3. Give a concrete example of how it can be used in learning

Team 4 – Dual Coding Theory: Wahaj, Melissa, Tim

Research your topic online and in your textbook. Create a 10-15 slide PowerPoint or Google presentation to share with the class that offers the following information:

History of the theory
Theorists associated with the theory
Timeline of theory development & use; is it still in use today?
Definition of theory
Application to instructional design
Several examples of the theory applied in instructional settings
How would you learn with this theory applied to instruction intended for you?

Presentation Design

Use the Dr. Codone Presentation Design Plan:
Title slide
Overview (repeat before each major section of presentation)
Hook
Content slides using visuals over text
Summary
Thanks & Questions slide
